

Strands: Food, health and culinary skills, Responsible family living **Elements:** Individual and family empowerment, Health and wellbeing

Title of task

Soup Savers

Learning Outcomes

Students should be able to...

- **1.1** identify the factors that affect personal food choices
- 1.3 apply a range of cooking principles and techniques in the preparation of healthy individual and family meals incorporating budgetary considerations
- 2.5 assess the importance of making informed and responsible decisions in everyday life
- 2.7 identify how individuals, families and households can contribute to sustainable and responsible living

Learning Intentions

We are learning to...

- Apply the design brief process to real life situations and document written evidence
- Identify a variety of cooking principles
- Make decisions based on research
- Give and receive feedback and use it to help with our learning
- Reflect on my learning

Success Criteria

- SC1 Evidence of design brief process being used to make sustainable decisions
- SC2 Give and receive peer feedback: note it and reflect on it
- SC3 Reflect on what went well and what could be done differently if starting a similar task

Context

Second year (mixed ability) students after 12 weeks. The students first completed a unit on Money Management/ Budgeting with a focus on the management of resources and applying financial literacy skills as they worked through a brief relating to meal planning. Students have an understanding of nutrition and can balance menus. The students have demonstrated numerous cooking principles in a range of dishes. The skills of the design brief process have been incrementally developed, starting in first year, through their application in practical textiles and practical cookery. After this task students went on to make their chosen soup and evaluate it.

Timeframe

2 weeks

Sample of work 1

Brief

Every year Irish households throw away €700 food *Stop Food waste Using the design brief process, carry out research on the types/ flavours of soup. Plan a balanced lunch menu including soup. Investigate garnishes used on soup. Consider how soup is a nutritious way to use seasonal produce and avoid waste.

(Think-pair-share) What was I asked to do?

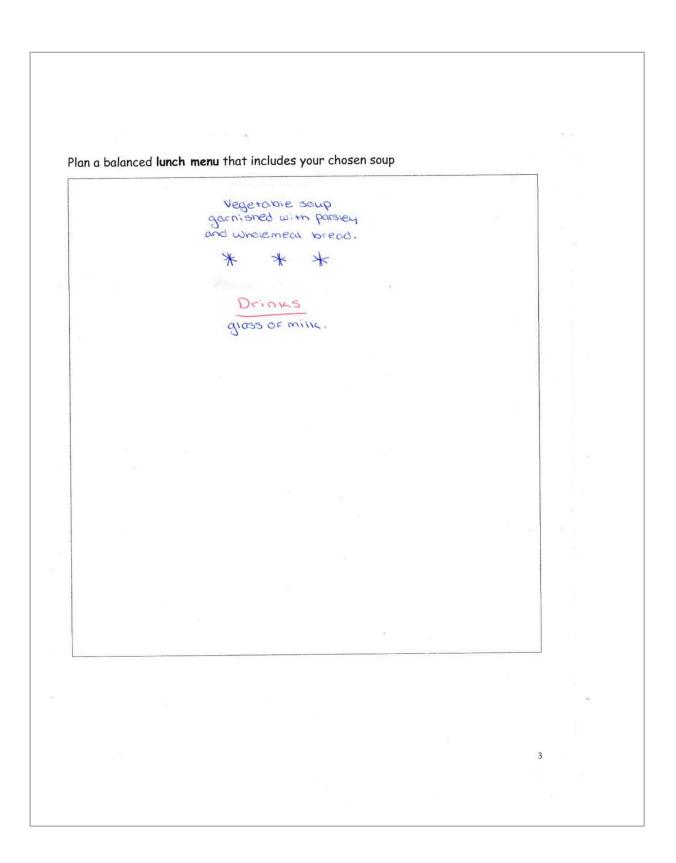

· I was asked to carry our research on the types and Flowards of soup
. I was asked to plan a bottoked lunch that included sorp.
· I was asked to investigate garaishes used on soup.
1 must make sure soup circen uses seasonal vegetaines
e i must avoid food waste, I could look at vegetables in fridge at
home Erst.
Considerations: What things do I need to think about when planning to prepare,
cook and serve soup?
· Likes and distikes will be important so the soup won't be wasted.
· I must consider the nutricoal value of the soup.
· (OST. Keep me soup on a tow budget.
· Consider any special diets such as vegan.
· How many people I am cooking for
· Do I have all the right equipment
· What ingredients on I need, the I have them at name?

Peer Feedback
Is the menu balanced?
Why? Yes, as it contains three of the four food groups.
included in the menu
Is the menu laid out correctly?
Why? yes the menu in a pax with stars seperating
our each course.
Did the student meet the brief (do what they were asked to do)?
The student did meet the brief as she carried out what
research was asked for a suitable recipe. The avoided frood
waste as vegetables can be sourced from fridge.
What could the student do to modify the soup?
They could add peas or necess or leakis to and protein.

Reflection
What feedback did you get (in your own words)
-My menu is belance.
- I have my menu raid out correctly.
- I avoided food waste.
- 1 met the brief by avoiding food waste and
 by planning a balanced lunch
What went well on this task?
 I think I did well + did
what I was asked to do.
 My soup is healthy + uses
up veg and avoids waste.
 I did research too.
What could I do differently if I were starting a similar task?
Use online recipes too as just using books didn't give enough locas. The internet would
```

Teacher feedback

- Used the design brief process to make sustainable decisions. There is mention of this in the SC1 considerations and in reasons for decisions. The work could be improved by demonstrating that sustainability is more than just avoiding waste.
- Good involvement in sharing feedback with others. Make sure to note the feedback others give you SC2 e.g. using pulse vegetables to add protein even if you do not think you will do it.
- SC3 The point on research and using other sources ("online") is good and will help in other tasks. In what went well you say what you did, the work could be improved by explaining why this is good?

Overall Judgement

In line with expectations
